

# FLOW CYTOMETRY IN PHARMA/BIOTECH

Results from a December 2017 survey of 68 flow cytometry users and managers in pharma and biotech. Flow cytometrists were also asked about a new product from Curiox that washes cells without centrifugation. How do you compare to your peers?

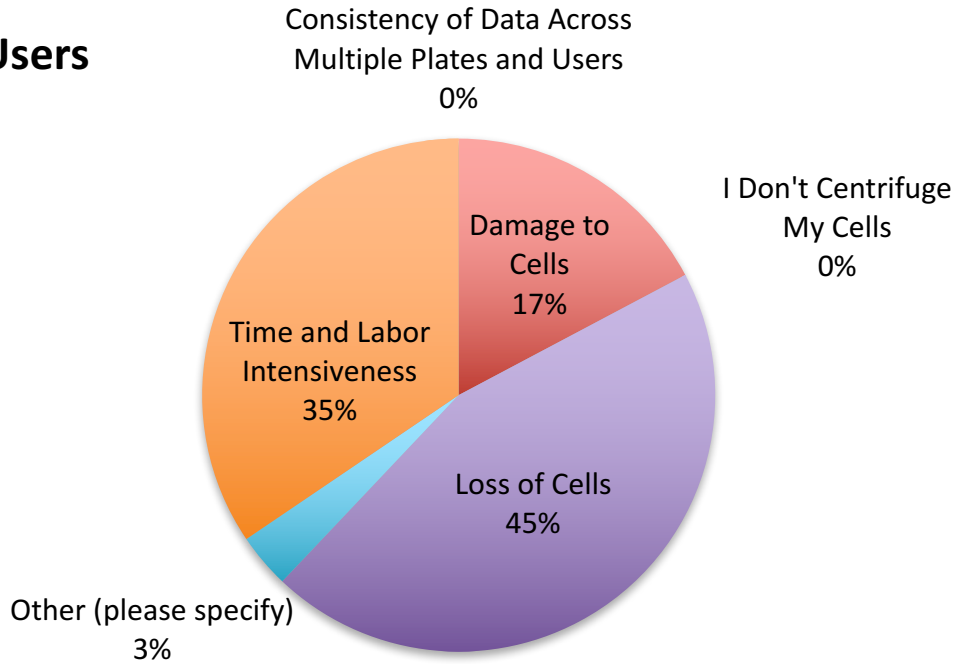

## SAMPLE VOLUME

Flow Cytometry Samples per Week

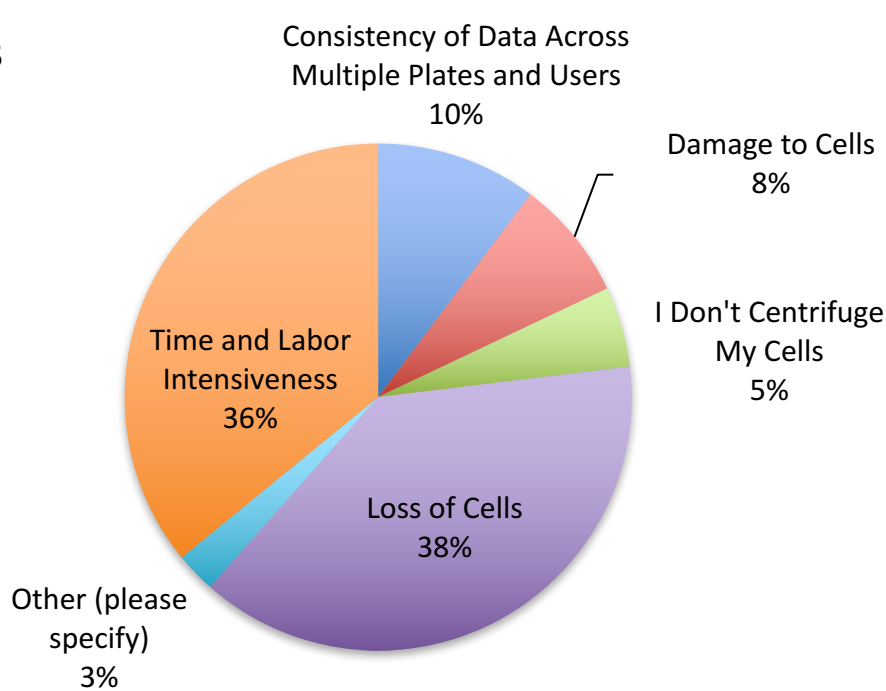

## FLOW CYTOMETRY USER & MANAGER CONCERNS

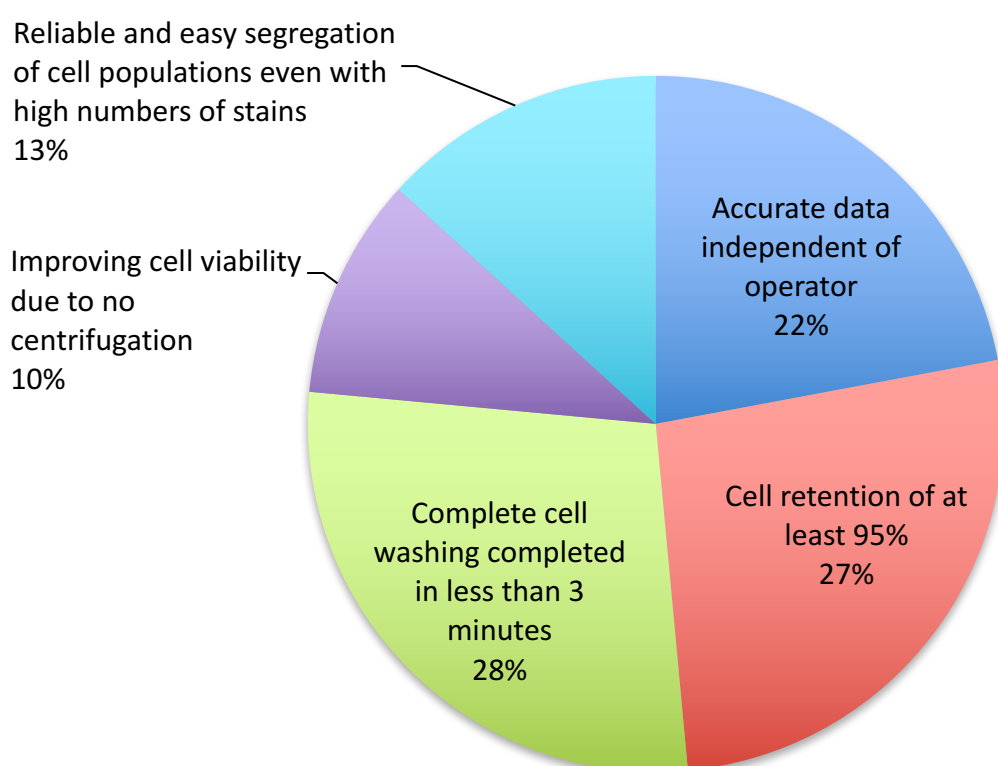

### End-Users

### Managers

## MOST APPEALING TRAITS TO IMPLEMENT

### DID YOU KNOW?

Managers of other flow cytometrists are 3x more likely than end-users to desire a way to control data caused by user variations.

Flow cytometrists in pharma are most concerned about loss of cells. Use of tubes and plates is fairly even (data not shown). Managers and end-users have similar concerns but managers would like to minimize user variation.
